

**Jason Huff, Ph.D.**  
Lead, Federal Science and  
Technology Engagement

Dr. Jason Huff is *Lead, Federal Science and Technology Engagement* at Lockheed Martin. His role is to understand global science and technology ecosystems and emerging markets and, build strong relationships with customers and partners to help guide and influence the next generation programs. This enables Lockheed Martin to extend its influence and begin shaping future programs and platforms years in advance.

Prior to Lockheed Martin, Dr. Huff was the Director, Business Development and Marketing for a small technology startup licensing hydrogen storage and fuel cell technologies. He started his career focused on the pulp and paper industry which led to a role at DuPont Company where he served in R&D, product development and market development roles for consumer, automotive and medical markets. Dr. Huff received a PhD in Chemical Engineering and Bachelor's degree in Mechanical Engineering from the Georgia Institute of Technology and an MS in Pulp and Paper Science from the Institute of Paper Science and Technology.
