What can Division Leader and Division Admin roles view.	Division Leader and Division Admin roles allow the individual to view the invention, agreement, and intellectual property records for their assign division.
How do I get back to my homepage?	Press the Home button to take you back to the homepage.
Why can't I download files?	All files in a record are internal documents used only by IPO. Lab staff outside of IPO do not have permission to download any files. If you have any questions about a specific record, please contact the appropriate assigned IPO technology manager.
Why are areas in a record greyed out?	Areas in a record that are greyed out indicate that you do not have permission to view them.
What is the IB number for inventions?	The IB number in the Innovation Portal is represented by the invention track code. The track code uses a Year-XXX format rather than the older invention naming convention of IB-XXXX.

Why do inventions not show up on my homepage?	Only inventions for which you were noted as an inventor will show in your homepage. If you are not an inventor, you will not have any inventions shown. If you have been given a role of Division Administrator, Division Leader, or Organization Leader, you will see inventions for your division and/or the organization in your homepage.
Is a Record of Invention the same as a patent?	No. A Record of Invention is an internal Lab document written by the inventor and submitted to the Lab's Patent group. Once your ROI has been reviewed by IPO, a staff member will contact you and a decision will be made as to whether or not a patent application will be filed. Simply submitting a ROI does not protect intellectual property rights. A patent application is a detailed document prepared by the Lab's Patent group and filed with the U.S. Patent and Trademark Office (USPTO).
Why does the Invention title not match the Intellectual Property title?	The intellectual property title may change from the invention title during the patent application process.
Why can't I see all the inventions in my division? Or for the entire lab?	Your user role will determine what inventions you can see in the Innovation Portal. If you are named as an inventor on an invention record, you will be able to see the invention. Users who have been designated as a Division Administrator or Division Leader will be able to see the division's inventions. Users designated as a Organization Leader will be able to see all the lab's inventions.
Why don't I see license agreements	You will only see agreements that you are associated with if you

I am associated with?	were named as the Principal Investigator and IPO added you to the Principal Investigator section of the agreement. Many of the older license agreement records were imported into the system from the old licensing management system. These license agreements may not list you if originally reported and entered as such.
-----------------------	--

Who is the contact for questions regarding my inventions or agreements?	Invention Record: Contact the Patent Manager, Technology Manager, or Business Development Manager assigned. License Agreement: Contact the Contract Manager (Licensing Manager).

Online Invention Disclosure	The ROI Submission link in the Tasks box has been renamed Online Invention Disclosure.
